

ADRIAN SOUSA

Charlotte, NC | 352-484-4782 | adrian.m.sousa@gmail.com | LinkedIn: [linkedin.com/in/adrian-sousa](https://www.linkedin.com/in/adrian-sousa) | GitHub: github.com/adrian-sousa

TECHNICAL DELIVERY LEAD • AI PROGRAM MANAGER

CORE COMPETENCIES & TECH STACK

Technical Delivery & Leadership: Enterprise Agile Execution • Release Readiness • Agentic AI Platform Architecture • Risk Governance • SDLC Prioritization • Executive Stakeholder Management

Languages, Tools & Data: Python • Go • JAX • SQL • Snowflake • Tableau • Supabase • PostgreSQL • FastAPI • Next.js • Docker • Jira • Azure DevOps • AWS • GCP • QLoRA Fine-Tuning

SUMMARY

Results-driven AI-focused Delivery Leader and Technical Program Manager with 10+ years of experience deploying Generative AI platforms, leading high-concurrency software delivery, and directing enterprise technical operations across Engineering, Product, Support, and Executive stakeholders.

PROFESSIONAL EXPERIENCE

HyrLink — *Founder / AI Product Builder*

Remote (Charlotte, NC) | Nov 2025 – Present

- Built a custom Small Language Model (SLM) from the ground up and executed QLoRA fine-tuning on a **4.94M record dataset** (4,942,386 training samples), achieving high parameter efficiency and 90% GPU VRAM cap stability.
- Led the design of all proprietary microservices and agentic orchestration using a combination of Python, JAX, and Go.
- Defined product architecture, SDLC, and risk mitigation to prioritize the original goal — bringing Talent Acquisition partners and Candidates together to bridge the gap.
- Reached 63 active users and delivered 386 tailored resume outputs, with users reporting a 37% increase in interview callbacks.

Cohesity — *Global Escalations Leader / Technical Program Management*

San Jose, CA / Remote | Jul 2021 – Dec 2024

- Headed cross-functional root-cause remediation for recurring platform issues and high-impact defects across a global install base, recovering an estimated **\$2.5M–\$4M quarterly** in combined customer and business-risk exposure.
- Led Jira-based sprint execution and release readiness for high-priority engineering workstreams; defined requirements, managed dependencies, prioritized remediation, and coordinated Engineering, Product, SRE, and customer stakeholders.
- Redesigned the onboarding program for SRE and Engineering across 5 global regions, reducing time to productivity from 90 to 37 days (**58% reduction**) and establishing a reusable training library.
- Built Python monitoring tools and API-driven scheduled automations to streamline operational triage, while running weekly executive syncs with VPs and C-suite leaders across 20–30 high-impact cases per quarter.

Finish Line Factory — *Architecture Consultant / Data Management & Compliance Engineer*

Pompano Beach, FL / Remote | Feb 2025 – Jan 2026

- Designed full platform architecture and data management, leading to year-over-year growth from **\$1.2M to \$2.7M**.
- Migrated unstructured Excel data into Supabase and Snowflake/Tableau pipelines with automated refresh intervals, introducing Python AI ingestion workflows that organized unstructured data prior to database ingestion.
- Used APIs to analyze product demand, order patterns, payroll administration, and monthly cost-versus-revenue data for operational decision support.

HCL Technologies — *Senior IT Analyst / Support Transformation*

Cary, NC | Dec 2018 – Jun 2021

- Managed enterprise delivery across multiple partner projects, improving processes and playbooks for junior engineers to learn, grow, and de-escalate high-risk platform issues.

- Helped reduce ticket volume by roughly **40%** (and improved resolution speed by 17%–38%) by improving knowledge base documentation, automation, and upskilling engineers.
- Supported client Azure environments through asset management, deployment activities, security-group administration, and coordinated infrastructure changes with technical stakeholders.

EDUCATION & CERTIFICATIONS

Western Governors University: Bachelor of Technology, Computer Systems Networking & Telecommunications (In Progress)

Harvard Online: CS50X, CS50S, CS50AI, CS50B, CS50W, CS50SQL, Python for Research

Stanford Online: CS229 (Machine Learning), CS221 (AI Principles), CS336 (LLM Architectures)

Certifications: Forward Deployed Engineering in the Age of AI • AWS Cloud Practitioner • Google Cloud Professional • CompTIA (A+, Network+, Security+, Linux+, Cloud+, Project+) • PMI CAPM
